Manufacturer part numbers after the dot. An Amphenol termination (AC-AMP/MP or IEC-AMP/FS) adds £250 to a T30 or T30X power cable.

NR and **QR** cables reduce power line noise. **XC** cables are designed specifically for Shunyata power distributors.

Power cables and digital cables are priced per cable. Additional length is charged per 0.25m. Cables shorter than the standard length cost the same as the standard length.

T30 and T30X umbilicals are designed for use between the Typhon 30A Amphenol output and a power distributor (including Denali), amplifier, or other component. Shortest practical length is recommended for each application.

Select one termination for the amplifier end and one for the speaker end. Bi-wire cables take two at the speaker end, tri-wire three. Gold-plated terminals are maintenance-free; bare copper needs occasional cleaning.

Terminations are supplied with the cable. Extra or replacement STIS v3 terminals can be bought individually — see Grounding.
